

**GLOBAL HEALTH SUMMER SCHOOL – Sunday 23 June – Saturday 6 July 2019
Coventry Campus**

This two week summer school delivered by the Centre for Global Engagement and the Faculty of Health and Life Sciences serves as an introduction to core concepts in Global Health. Through an interdisciplinary approach, students will learn about the ways in which the health of individuals is shaped by socio-political forces.

Students will participate in a range of activities including workshops, lectures, practical and social activities. They will work with students from other universities around the world as part of the overall Coventry University summer school programme as well as being part of the cohort for the Global Health module.

Students will work in small groups on a patient-focused interdisciplinary healthcare project which they will present as a group, Dragons Den style on the final day.

Programme and Learning Outcomes

The 2-week programme outline is on the following pages. This is a broad summary and some sessions may be subject to change. By attending the Global Health Summer School module, students will have the opportunity to:

- a. Develop their understanding of the relationship between the health of the individual and their socio-political circumstances.
- b. Understand the impact of international and national factors on health at the local level.
- c. Understand the different types of health systems by sharing case studies and experiences from around the globe.
- d. Develop critical analysis skills through workshops and presentations.
- e. Define key terms and concepts around health, nutrition, poverty, and inequality.
- f. Visit and tour a major National Health Service (NHS) hospital and compare similarities with hospital settings in their own country.
- g. Work in a small group with students from other healthcare settings on an interdisciplinary student focused project.

Teaching methods:

- The module will be taught through lectures, interactive activities, simulation sessions and excursions.
- Students are encouraged to engage with the module content and ask questions during lectures and sessions which will be interactive in nature.
- There will be time built in to every session for questions and students will be encouraged to participate fully throughout.

Certificate

The Global Health Summer School is non credit bearing. Students will receive a personalised certificate at the end of the two weeks.

Cost

£1495 for certificate only module, to include accommodation in student halls on a room only basis.

Breakfast and dinner can be included at additional cost if preferred.

Day trip to Warwick Castle is optional and charged at £40 pp including transport.

Global Health Summer School 2019 – Coventry University 23 June – 6 July 2019	
WEEK 1	
Sunday 23 June	Arrival in Coventry and check into accommodation in student halls. Room only accommodation is included in the cost and our halls are located in the centre of Coventry and within easy walking distance of campus buildings, shops, restaurants and other attractions in the city centre which include a multiplex cinema, sports centre and ice-skating rink.
Monday 24 June 9.30 am – 3.00 pm	<ul style="list-style-type: none">• Welcome and Introduction to Coventry University by the Centre for Global Engagement.• Document checks• Campus familiarisation and tours.• Welcome afternoon tea
Tuesday 25 June Module Session 1 9.30 am – 3.00 pm Lunch period: 12.00 pm – 1.30 pm	Introduction to the Faculty of Health and Life Sciences and your module Global Health – Local and International Perspectives Tour of the Faculty of Health and Life Sciences and introduction to simulation facilities in the recently opened state of the art Alison Gingell Building. During this session students and staff will get to know each other, and share professional background and experiences. We will discuss approaches to healthcare in different countries and compare differences from a patient perspective. We will also start to think about the factors affecting health (social determinants of health).

	<p>Over the two weeks students will work on a global health related project in small groups, and will present their proposals to a panel on the final day. The project will focus on a 'patient', an elderly gentleman living in the UK with a series of health issues. Using the learning they have developed during the two weeks, students will present an inter-professional care plan for our patient on the final day.</p>
Wednesday 26 June	<p>Day trip to medieval Warwick Castle in the heart of nearby Warwickshire. This activity is optional for additional cost of £40 pp including return coach transport.</p>
<p>Thursday 27 June Module Session 2 9.30 am – 3.00 pm</p> <p>Lunch period: 12.00 pm – 1.30 pm</p>	<p>Today the School of Nursing will introduce our patient who is the subject of student projects.</p> <p>Students will begin to think about the different factors that impact on health including diet and exercise, social and psychological factors.</p> <p>The School of Life Sciences will deliver patient-focused Sport and Exercise and Nutrition sessions and students will learn how health professionals work with Sports and Nutrition experts to understand the support that can be given to patients.</p> <p>This will include practical sessions that demonstrate equipment and technologies available in assessing and improving individual's mobility and performance.</p> <p>Group work to discuss our patient and how students will start to formulate his care plan.</p>
Friday 28 June Early start	<p>Day trip to London by train.</p>
<p>The weekend is free to explore the local area or maybe go further afield. Coventry is located in the centre of England and has excellent rail and bus links to other parts of the United Kingdom including Birmingham, London and Manchester.</p> <p>Week 2 details on next page.</p>
